Professional profile

Software engineer specialized in backend development with over 12 years of experience designing scalable systems, APIs and integrations across multiple platforms.

Experienced in building microservice, distributed systems and integrations with marketplaces and ERP platforms, working with technologies such as Typescript/ Nodejs, Python, PHP, NestJS, Django and Laravel

Technology Stack

TypeScript, Node.js (NestJS), Python, PHP · **Microservices**, APIs REST, **distributed systems** · RabbitMQ, Redis · **PostgreSQL**, MongoDB, MySQL · **AWS**, **Google Cloud**, **Docker** · Django, Laravel, Symfony · Git, CI/CD, testing automatic, **Clean Architecture**.

Professional Experience

Senior Backend Engineer (Bidcom - Argentina)

February 2025 - present

Development of microservices and integrations for e-commerce platforms (Amazon, TikTok Shop, Mercado Libre) and Odoo ER, focused on inventory management, product listings and order processing across multiple marketplaces.

- Development of microservices using TypeScript and Nestjs
- Integrations with Amazon, TikTok Shop and Mercadolibre for product listings inventory and order management
- Management of 65,000+ active products listings
- Processing of 20,000 sales during high-traffic events (Hot

- Inter-service communication using RabbitMQ
- Data persistence using MongoDB
- Development of custom Odoo modules in Python
- Synchronization of products, stock and order between marketplaces and ERP
- Automation of order processing workflows

Backend Developer (Antártida - Argentina)

March 2022 - January 2025

Development of backend systems and integrations with external platforms for delivery event management and sports management solutions.

Event Platform-Pretix

- Backend integrations developed using Python and Django.
- Asynchronous processing implemented with Celery
- Integration with payment systems and automation of event workflows

Sports Tournament Platform — Padel Go

- Backend architecture design using NestJS, Node.js, Redis, PostgreSQL
- Implementation of background processing queues using BullMQ
- Implementation of notification systems (email, SMS, and WhatsApp)
- Deployment on Google Cloud Run

Backend Developer (Conexa - Argentina)

October 2019 – January 2023

Development of backend services and APIs for enterprise platforms focused on system integrations and process automation.

Delivery Integrations — Grupo Delosi

- Integration of 400+ restaurants with Rappi, PedidosYa, and DiDi
- Development of APIs for synchronization of orders and restaurant data
- Implementation of processing and synchronization workflows between platforms
- Technologies: Node.js, PHP (Laravel, Horizon), PostgreSQL

- Design and development of REST APIs

Educación

- **Bachelor's Degree in Computer Engineering**, Universidad Centro Occidental Lisandro Alvarado — 2018
- **Systems Analyst**, Second highest GPA in the Systems Analyst graduating class, Universidad Centro Occidental Lisandro Alvarado — 2012

Certificaciones y Formación

- Microservices Architecture
- Backend development with Node.js and NestJS, Python and Django, PHP and Laravel
- Docker and cloud infrastructure (AWS and Google Cloud)
- Python Certification (Python Institute) — [PCEP-30-02 — 27/10/2024](#)
- DevOps Certification — Universidad Tecnológica Nacional — 15/12/2023
- MongoDB Courses: [M001: MongoDB Basics \(Archived\)](#), [M103: Basic Cluster Administration](#), [M040: New Features and Tools in MongoDB 4.0](#)

Idiomas

- Spanish - Native
- Inglés - Professional working proficiency
